TECHNICAL SKILLS

Languages : HTML, CSS, JavaScript, Familiar with Java and Python

Frameworks/Libraries: NodeJs, Express, EJS, React, Redux, React-Bootstrap

Databases/Tools: MongoDB, Git, Github, VScode, Vite, NPM, Linux, APIs, Eager to learn many more!

PROJECTS

LOCAL | <https://github.com/olvbntly/LOCAL> | JS, React, Express, NodeJS, MongoDB, Redux

- Developed a full-stack MERN application that implements a comprehensive system that enables admins to input and manage information about local businesses seamlessly
- Established user-friendly functionality for users to search for local businesses based on zip code, presenting results in an easily accessible list format
- Utilized the Google Maps API to enhance the application by displaying businesses location on an interactive map within the information page

Personal Website | <https://oliviabrantly.dev> | HTML, CSS, JS, React

- Created a personal website using React and Bootstrap-React, giving it a professional and responsive design
- Included an embedded resume on the site, offering a detailed overview of my skills and experiences
- Developed a slideshow to showcase projects with screenshots and direct links to their GitHub repositories

Resume Generator | <https://github.com/olvbntly/resume-generator> | HTML, CSS, JS, React

- Developed a web app designed for creating pre-formatted resumes, simplifying the resume-building process
- Enables real-time updates to the resume as users fill out the forms, providing instant visual feedback
